ALTA ENVIRONMENTAL

SPECIALISTS IN BUILDING SCIENCES

Alta Environmental is a leading building sciences specialist, providing building related hazardous substance management to building designers, builders, owners and managers.

The building science team is comprised of workplace health and safety specialists with years of experience. The Alta Environmental team benefits from a strong network of offices throughout the state.

Our services are supported by dedicated specialists in the field of building related hazardous substances including, asbestos, lead, microbial contaminants, indoor air quality, infection control and industrial hygiene, and our comprehensive and sustainable solutions are delivered to a wide variety of business sectors, including commercial, industrial, healthcare, biotech, residential and government.

In healthcare, biotech and other critical and sensitive facilities, our specialists also provide infection and contamination control assessments, mitigation planning and implementation and oversight.

EXCEEDING CLIENTS' EXPECTATIONS

Alta Environmental provides a complete range of workplace health and safety services from high-level strategic advice, identification, analysis, risk classification, remediation design, management and closure, to monitoring and analysis of contaminants in the built environment.

Evidence of exceeding client expectations is reflected by our high frequency of repeat business. We deliver a broad range of services to our clients and customize services to adapt to their needs.

Alta Environmental encourages our staff to be specialists in their field and to stay abreast of the latest developments. Our people are constantly asked to participate in various forums and advisory boards, and we proudly conduct extensive research into workplace health and safety hazards.

SHARING OUR EXPERTISE AND HISTORY

Alta Environmental is dedicated and thrives on being a client-focused organization. We understand the business dynamics within which our clients operate and provide proactive and effective solutions that best meet their objectives.

On an operational level, we recognize that each client is different. We aim to effect the most practical and cost-effective arrangement. Our overall objectives remain the same – these being to effectively manage time, cost and quality to best meet the needs and management style of our clients.

Alta Environmental has an extensive education program, which includes formal education assistance, workshops, training programs and “technical topic” meetings, ensuring we remain leaders in our field and we extend this training to our clients.

- Clients have access to trusted specialist expertise
- We assist in refining workplace health and safety building related hazardous substance strategies
- We conduct our business with integrity and professionalism
- Our business is about reputation, results and developing strong links to a diverse range of clients and communities
- We demonstrate flexibility in managing special issues with our clients

OUR SERVICES

DEVELOPING SOLID RELATIONSHIPS

Alta Environmental partners with our clients by developing solid and long-term client relationships. We work together with clients throughout the consultative process to ensure compliance with a myriad of regulatory requirements. Our specialists are highly trained, experienced and knowledgeable. Partnering with our clients means we assist in identifying needs and help to manage building related hazardous substances.

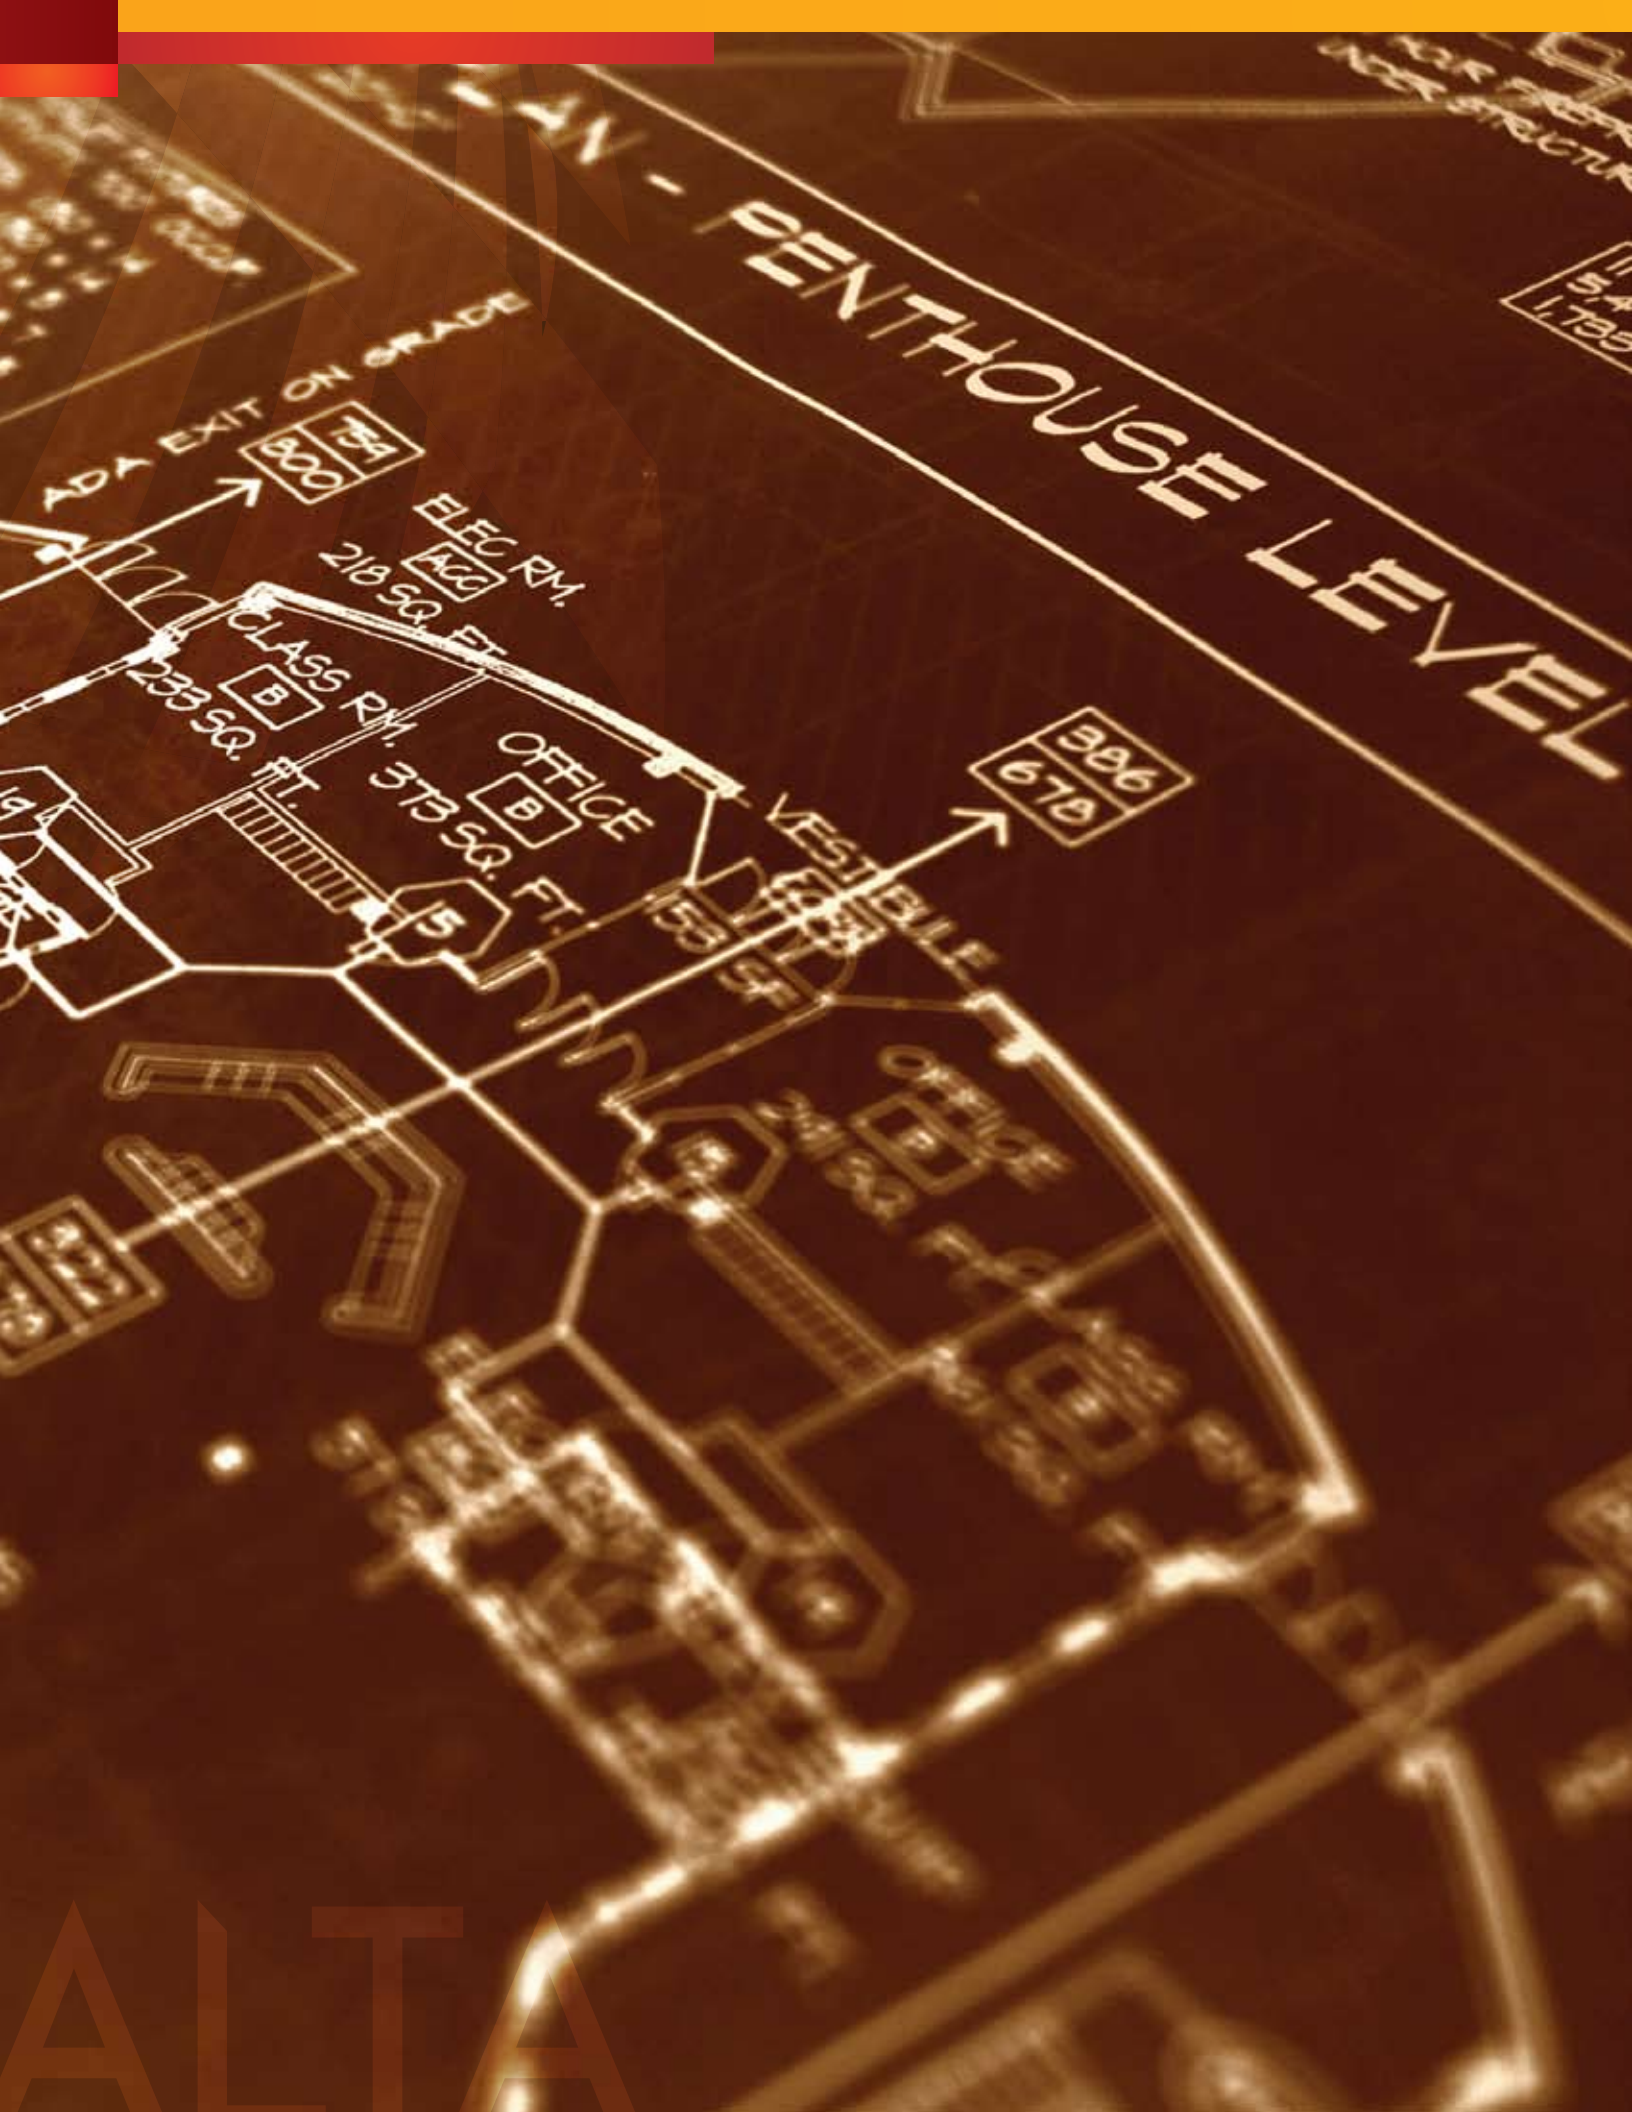

Alta Environmental's value-added-services has led to a number of cases where we have saved a client both time and expense. As a solutions based company, we qualify and quantify what the client is trying to achieve and recommend various options on how these goals can be attained. Adding value is a large part of this process and due to the expertise, experience and knowledge of our staff, we are able to help our clients achieve short and long-term efficiencies.

Whether we are assisting clients with a planned renovation, demolition, or an emergent issue, clients have learned to depend on our responsive, practical and value-added solutions.
